

# A Biblical Conundrum

By Richard Tornello

Population Genetics  
 A subject,  
 Proposes:  
 That 150 people did mosey  
 their way from below.

To the rest of the globe  
 they all did stroll.  
 And what they were then,  
 are we today.  
 Only “slightly” off in some ways.

Yellow Black Red  
 Pink and Brown,  
 And it’s said  
 This spectrum’s from the same bed!

How, might you query  
 Did we become oh so many?  
 Varied but much quite the same?

Are the 150 who dared to go and off  
 the Adams and Eves of our myths?

If that is the case,  
 then:  
 on its bold face  
 then:  
 From whence, did conceive of this here race?

Jokes on this coast  
 Of Virginia West  
 A situation,  
 At not seen as best.  
 Please  
 be somewhat kind.

That situation,  
 oh this bind  
 Wrap around my axles mind.  
 So  
 In conclusion, I do find:

It's brothers and mothers  
sisters and fathers  
and combinations I can only just guess.  
who coming together,  
loved one another, and  
started this one, big old mess.  
(Not intended would be my guess)

So maybe we can  
In our minds understand  
That's been inbred again and again.  
The resulting effects  
Of,  
and these genetic defects  
of,  
are not norms  
that we should take as granted.

What historically's been claimed,  
in varied gods names,  
Are caused,  
really,  
from bedding our kin.

Based on behavior  
That transcends a savior  
We're screwing each other all day.  
If it ain't in the bed  
Or things that we said  
It's in the streets and in a war.

Perpetual insanity, genetic inanity  
Psychology, dysfunctionality,  
of one large planetary family.
