

God Doesn't Play Dice By Richard Tornello

AND GOD is concerned.
 Concerned his simians might get it.
 Reality - Nature.
 Holographic principles/ INDRA'S NET a clue.
 Time dilation as a glitch.
 Non locality a wrong thrown switch.
 The Grand Design trade-off needs,
 Computational power for
 The multi universe life simulations deeds.
 Running all the TIME
 Open for the few.
 God is concerned his players
 Will awake.
 Their own decision they might make.
 So to those that do
 Scrambled brains
 Or
 Martyrs they become,
 While the rest,
 Well, they're are caught up in the games,
 Spanning millennia or two.

Apocalypse you say?
 It's just the plug being pulled.
 God goes to the kitchen
 Gets a snack and back to the play.
 Boots up and begins again.
 The big bang?
 The on switch.
 Conservation of energy shows
 2nd law of thermodynamics holds
 Reincarnation's energy old,
 New, in recast moulds.

“Hey Shiva, can you get me a brew?”

The End
